### **SUMMARY**

---

A collaborative, hard-working, and aspiring games programmer looking for a role within games & software development that will allow the further development of technical and team working skills. I have a forward-thinking approach and always strive to finish any project to completion.

### **EDUCATION**

---

**BSc Games Programming Degree, SAE London**  
(September 2019 - August 2021)

**A-levels, Kingsmead School Sixth Form**  
(September 2017 - June 2019)

- Computer Science - A
- Sociology - A
- Mathematics - C

**GCSEs, Kingsmead School**  
(September 2013 - June 2017)

- 11 GCSEs, grade A\*-B

### **EXPERIENCE**

---

**Warehouse Assistant, Waitrose**  
July 2020 - Present

- I work as part of a team to ensure every customer's order is completed by the end of the shift.
- Became an FCMS system expert and often help management in taking care of day-to-day activities in and around the warehouse.
- Taking initiative, I started automating several aspects of the warehouse's system. Learning new skills, such as JavaScript and Google Scripts, along the way.
- Having been recognized for my programming skills, I was able to take on a personal project. This involved creating software that organizes important warehouse data on a daily basis. Additionally, the software produces weekly and monthly summaries of the warehouse's progress.

**Librarian Assistant, Kingsmead School**  
February 2018 - July 2019

Alongside my studies, I worked at my school's library.

- Ensuring I was friendly, approachable and communicating effectively as I dealt with student queries
- Keeping organised and up-to-date by logging books into the electronic system
- In a 1 month long project I aided the library team in reforming the logging system and reorganising the library space
- Noticing the outdated paper system. I took the initiative and programmed an electronic theatre booking system for my colleagues to use instead.

**Animal Carer, Elmtree Pet Hotel**  
July 2016

To gain work experience I assisted a pet hotel.

- Worked collaboratively in a team to ensure a safe environment for the animals
- Working flexible hours, I was always punctual for the start of my shift
- Ensured the working space was clean and organised
- Made sure the dogs were well fed and walked

## SKILLS

---

- Some skills in Python with capabilities of appJar and SQL
- Skilled in C++ & C#. Mainly working with Unity.
- Currently developing skills in JavaScript. Working on Google Scripts to create macros.
- Full UK Driving license.
